William John Hunt Jr.

Senior Full Stack Software Engineer

Sunbury, NC 27979 | (757) 506-8279 | contact@williamhuntjr.com | linkedin.com/in/williamhuntjr | github.com/williamhuntjr | www.williamhuntjr.com

SUMMARY

Senior full-stack engineer with 7+ years building production web applications, including 5+ years with React and TypeScript. Works across the stack with Next.js, Node.js, Python/Flask, PHP, PostgreSQL, and Supabase, backed by Docker, Kubernetes, and CI/CD. Recently built and launched Instora, an AI-powered SaaS for real estate agents using Next.js and the Anthropic Claude API. Helped lead a marketplace platform migration at Trader Interactive and has mentored 5+ junior developers.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, PHP, HTML5, CSS3, Bash

Frontend: React.js, Next.js, TypeScript, Material UI, Less/SASS, SSR/SSG, Responsive Design, Vue 3, Nuxt.js

Backend & APIs: Node.js, Python/Flask, PHP, REST APIs, Stripe Subscriptions, Square Payments

Databases: PostgreSQL, Supabase (RLS), MariaDB, MongoDB, Redis, Elasticsearch, Flyway Migrations

Cloud & DevOps: AWS (EC2, ECS, Route53, S3), Vercel, Sentry, Docker, Kubernetes, Helm, GitHub Actions, Jenkins, Ansible, Linux, Nginx

Testing & Performance: Jest, PHPUnit, Optimizely (A/B Testing), Core Web Vitals, PageSpeed Insights, DebugBear, Technical SEO

AI: Anthropic Claude API (LLM integration), AI-Assisted Development (Claude)

Practices: Agile/Scrum, Code Review, Mentoring, SOLID

EXPERIENCE

Senior Software Engineer

Mar 2023 – Present

Trader Interactive, Virginia Beach, VA

- Helped lead the re-branding and platform migration of Boatline.com to Boatmart.com, moving the product from a Laravel/Next.js application to a shared platform built with MariaDB, PHP, Node.js, and Vue.
- Completed the core boat PHP library the migration depended on and extended several other shared PHP libraries with missing functionality, writing PHPUnit tests alongside each feature.
- Partner with senior developers and architects to migrate a custom PHP framework to a server-rendered Nuxt.js application, implementing SSR/SSG, state management, and server routes for lightweight backend endpoints and proxy services.
- Helped write the initial GitHub Actions deployment workflows for the new SSR application, and manage production assets in AWS S3.
- Improve Core Web Vitals and page performance with code splitting and lazy loading, using PageSpeed Insights and DebugBear to find and fix bottlenecks.
- Own technical SEO through platform migrations, including structured data (JSON-LD), canonical URLs, 301 redirects, and sitemaps, preserving search rankings and crawlability.
- Run controlled feature experiments with Optimizely, validating changes with real user data before full rollout.
- Built the initial prototype of the Inventory Advisor feature on the vehicle detail page (VDP), then handed it off to a Level 2 developer to complete and ship.
- Use Claude AI to speed up debugging and write complex unit tests.
- Served as Scrum Master for a six-person team, leading daily standups and supporting sprint planning and Agile ceremonies.

- Mentored and onboarded 5+ junior developers, review 10+ pull requests per week, assist with releases, and helped evaluate candidates and select the team's current Level 2 developer.

Founder & Full Stack Engineer Aug 2026 – Present

Instora (AI SaaS for real estate agents), instora.io

- Built and launched Instora solo in about two months: an AI marketing SaaS that turns a single real estate listing into social posts, SEO listing copy, a video script, and a lead-capturing listing page.
- Integrated Anthropic's Claude API to generate listing descriptions, SEO copy, Instagram, LinkedIn, and X posts with hashtags, and video walkthrough scripts.
- Built on Next.js, Supabase, and Vercel, securing each agent and team account with Supabase row-level security (RLS) policies.
- Implemented Stripe subscription billing across three paid plans, with a free first listing to drive sign-ups.
- Built public listing and agent pages, QR code generation for flyers and open house sign-in, and a leads dashboard that collects buyer inquiries in one inbox.
- Built a reporting overview and automated weekly summary emails, and monitor production errors with Sentry; currently onboarding beta users.

Founder & Full Stack Engineer Sep 2022 – Present

GrubStack (pre-launch SaaS), Gates, NC

- Designed and built a subscription-based SaaS platform for restaurant online ordering, made up of four applications: a Python/Flask REST API, a React/Next.js customer dashboard, a web ordering app, and a terminal app.
- Built dashboard features for payment integrations, deployments, and subscriptions, backed by an abstract payment class that processes payments through Square or Stripe.
- Architected a Kubernetes cluster with a private Docker registry and Helm charts for per-customer deployments, with Jenkins pipelines that build and deploy all four applications.
- Manage database schema changes with Flyway migrations, maintain the server stack, and provision Kubernetes nodes on demand.

Full Stack Developer Oct 2022 – Mar 2023

Emergent Cybernetics, Remote, USA

- Developed finance applications using Next.js and React.
- Containerized applications with Docker and wrote Ansible scripts to automate deployments.
- Built CI/CD deployment pipelines in Jenkins.

Full Stack Developer / DevOps Engineer Feb 2019 – Oct 2022

xTuple, Norfolk, VA

- Built a customer portal with a React front end and a Python/Flask API for ERP software customers.
- Built a private, Dropbox-integrated application for secure file sharing.
- Managed customer server instances on AWS EC2, configured security policies, and updated DNS in Route53.
- Automated infrastructure tasks with Ansible, Bash, and Jenkins, and performed ERP software upgrades for customers.

ADDITIONAL EXPERIENCE

Linux System Administrator — TEKsystems, Virginia, USA Nov 2018 – Feb 2019

Linux System Administrator — Five Rivers Services, Virginia, USA May 2018 – Nov 2018

Tier2C Linux System Administrator Manager — InMotion Hosting, Virginia Beach, VA Dec 2015 – May 2018

EDUCATION

College of the Albemarle, Elizabeth City, NC Aug 2008 – May 2012

Associate's Degree, General Education

President's List & Dean's List every semester; 3.7 GPA.
